## CURRENT

---

today JAN 2014	<b>Postdoctoral Researcher</b> <i>Lund University, Department of Automatic Control, Lund, Sweden</i> Supervisor: Prof. Karl-Erik Årzén Research topic: I am involved in the Cloud Control project. We take a control theoretic approach to a range of cloud management problems, aiming to transform today's static and energy consuming cloud data centers into self-managed, dynamic, and dependable infrastructures, constantly delivering expected quality of service with acceptable operation costs and carbon footprint for large-scale services with varying capacity demands. Such data centers will form the backbone of the digitalized society by providing unparalleled information storage and processing capabilities.
